LOVENSE

Mini Sex Machine

App-controlled Mini Sex Machine.

The Lovense Mini Sex Machine is a powerhouse with a compact size and versatile adjustments for every user's needs. Upgraded with self-lubricating design helps reduce defective issues and improve user experience (additional grease may be required after 1-2 years of use).

Easier assembly and adjustment for users with 260 strokes per minute for pleasures (at minimum stroke length). Adjustable stroking length of 3 to 7.5cm for different penetrative needs. The Mini Sex Machine comes with Vac-U-Lock adapters that are cross-compatible for different kinds of dildos.

LOVENSE

Mini Sex Machine Features

Powerful and quiet

260 strokes per minute with a maximum noise level of 60dB.

Compatible

Available with any Vac-U-Lock compatible attachment.

Easier assembly & adjustment

Three times as many users say the Mini Sex Machine is "very easy to assemble."

Lightweight

70% lighter than the Lovense Sex Machine, efficiently reducing shipping costs.

Versatile

Offers a variety of heights and angles for each position needed, with an adjustable stroke length of 3-7.5cm.

LOVENSE

Heights & Angles

High horizontal

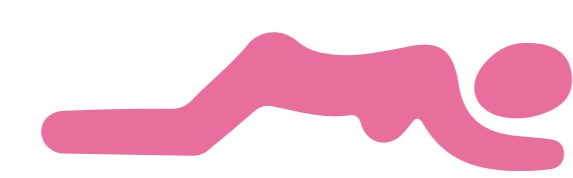

• Doggy style

Downward angle

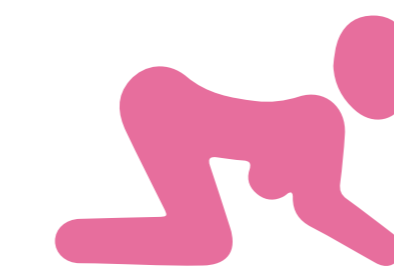

• Prone • Missionary

Upward angle

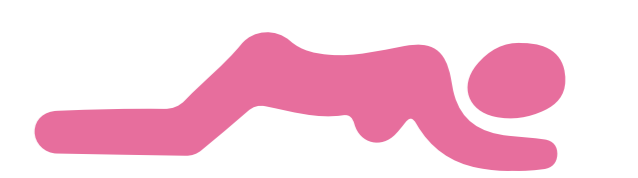

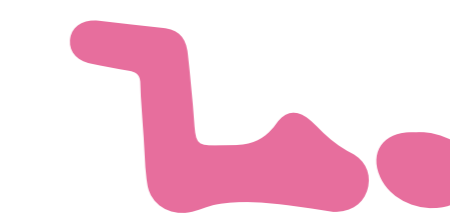

• Doggy style

Low horizontal

• Anal • Missionary • Spooning

Vac-U-Lock Adap^r

Use any Vac-U-Lock compatible attachment

Note:

The included dildo is the LSM's small dildo.
The Vac-U-Lock adapters are cross-compatible.

LOVENSE

Control Features

Emergency Stop

When the machine is thrusting, pressing the red button down will power off the machine and make it stop immediately.

To make the machine thrust again:

- Power on the machine
- Turn the knob to the off position
- Increase the speed again

Gradual Speed Increase

When suddenly increasing machine speed, the machine will gradually increase to the target speed.

This feature reduces the likelihood of discomfort caused by abrupt changes in speed.

The gradual increase is effective when changing speed with both the control box or apps.

Control Features

Resistance Threshold Stop

If the thrusting rod encounters excessive resistance when thrusting, the machine will stop thrusting to prevent user injury.

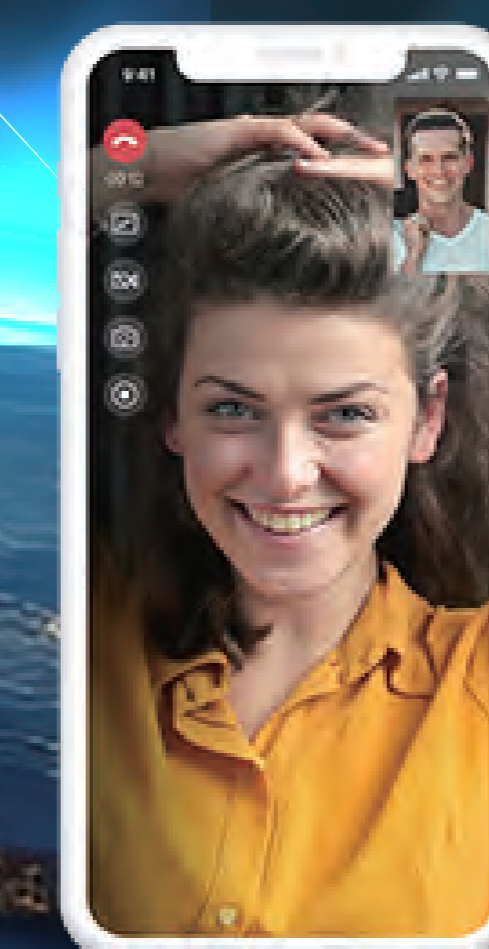

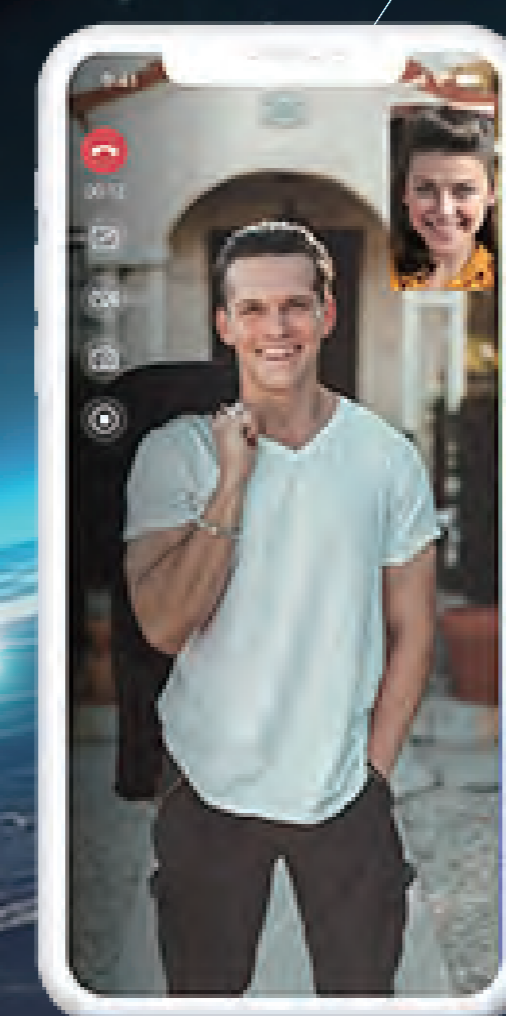

To make the machine thrust again, the user will need to turn the knob to the off position and then increase the speed again.

Note: the force required to activate this feature can be adjusted in the app.

Mini Sex Machine Sync Features

Two-way interactivity of the Mini Sex Machine allows it to interact with Calor, Max 2, and Solace. The machine will respond to your movements and send feedback to your partner.
